Environmental Mission

Our vision and goal is a sustaining supplier, manufacturer and customer for the long term protection and preservation of our environment for future generations.

MISSION
To achieve this vision, we are dedicated to ensuring the health and wellbeing of all of our partners, reducing negative impact on the environment, and maintaining price structure by increasing efficiencies and reducing consumption.

JSI, and it's parent company, is an internal manufacturer and has been an environmentally conscious organization for more than 80 years.

We are proud to use wood as our primary sustainable material resource and all corporate policies and procedures support the efforts to "recover, recycle, reuse, repurpose, reduce, refuse, and re-engineer". In doing this, we are committed to the conservation of the environment and its natural resources as well as encouraging our suppliers and customers to do the same. A goal of a "Sustainable Partnership", supplier, manufacturer and customer, is essential for the long term protection preservation and sustainability of our environment for future generations.

LOCATION
Our manufacturing facilities are located in the center of Southern Indiana. With our diverse product offering and manufacturing capabilities, we provide a single source for all of your project needs allowing you to conserve our fossil fuels and reduce greenhouse gases.

PACKAGING
We place emphasis on the minimal use of disposable packaging while still providing adequate protection to the finished product. Our corrugated packaging is recyclable, reusable, and up to 100% recycled content. We reuse or recycle more than 175 tons of corrugated material annually.

REGULATORY
All of our manufacturing facilities are in compliance with applicable OSHA regulations and meet or exceed all applicable DEM and EPA regulations for air emissions, storm water and hazardous waste disposal.

MANUFACTURING FACILITIES
Our manufacturing facilities are geared toward eco-efficiency and are encouraged to continually improve and conserve. Solid wood not used in the direct manufacturing process is recovered for the operation of our dry kilns, thus reducing greenhouse gases, the use of fossil fuels, and the burden of waste placed on landfills. Composite panels not used in the direct manufacturing process are ground and sold for use as animal bedding and boiler fuel. In addition to other energy savings techniques, our manufacturing facilities use high efficient lighting, make use of power factor capacitors, and encourage all to conserve and reduce energy consumption and water usage. Condensation pumps are used to aid in water conservation as well as extending boiler life.

MANUFACTURING PROCESSES
Our finish processes utilize efficient spray guns and proper spray techniques to reduce wasted material. Excess finish material, solvents, and waste are recycled. Many of the assembly processes use water based glues that contain no hazardous ingredients.

TEXTILES
Many of our fabric options utilize up to 100% recycled content. Our leather alternative program includes selections that contain no toxic materials, plasticizers, heavy metals, or formaldehyde and have a 100% biodegradable back cloth. Some of the available panel fabric used, if discarded is a biological nutrient for the soil. Most of the components (foam, batting, and polycord) used in upholstered products are recyclable. Excess fabrics and leathers not utilized in the upholstery process go to recyclers and local charities for additional use.

WOOD
Wood is the most diverse, most process friendly, and most widely utilized natural resource in mankind's history. No other natural resource can match the environmental advantages of wood, including being renewable, recyclable, natural, carbon negative, and biodegradable. Utilizing the sun's energy, trees grow and remove carbon dioxide from the air while giving off oxygen to benefit the entire planet. Approximately 49% of wood's dry weight is carbon and harvesting mature trees in a sustainable forest, which has slowed in the absorption of carbon dioxide, allows the photosynthetic cycle to continue at full optimization and allow for the carbon to remain sequestered. We are proud to use wood as our primary "sustainable" renewable resource.

WOOD OPTIONS
Many environmentally friendly solid wood and engineered wood options are available for quote, including: Lyptus®, Plyboo®, reclaimed woods, agricultural and post-consumer waste fiber products, etc.

INDOOR AIR QUALITY
Our goal is to reduce the impact our products will have on the indoor air quality. We practice the latest technologies and utilize a third party to assure we meet this goal. GreenGuard, one of the leaders in IAQ certification, continues to certify our product offering with UL2818-GreenGuard Indoor Air Quality certification.

Unique Characteristic of Natural Woods and Veneers
JSI uses high quality wood and veneer harvested from sustainably managed forests. Every tree has unique and defining characteristics, like fingerprints. These characteristics can be defined by differences in color, grain configuration, and textures. These characteristics will be more noticeable if the product has a clear or lighter finish.

JSI uses select beech, cherry, maple, oak and walnut cut wood products to produce the desired look of our furniture products.

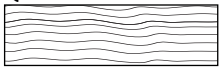
Maple and Cherry species have a higher degree of uneven distribution of grain, small color streaks, and pin knots.

At JSI, we take care of selecting woods and veneers that are used in our products. With this in mind, we hope you appreciate the beauty of each tree's fingerprints. Products will not be replaced due to these natural characteristics.

Veneers can be sliced in a variety of ways to create unique patterns. JSI uses several different patterns, as shown below.

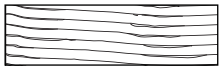
Flat (Plain) Cut as shown

Quarter Sliced as shown



Double Cut as shown

Rift Cut as shown



Double Cut
The Double Cut veneer is a processed product that has at least two cuttings to create the final veneers. These cuts of veneer strands are dyed and layered into a block to create variation of patterns from a very tight grain pattern to an exotic figure grain pattern.

JSI offers two collection of veneer, our Essentials and Artisan Collections.

Essentials
The Essentials Collection allows users to specify beautiful veneers, without sacrificing budget, providing grain patterns and hues for maximum material flexibility and style range.

Artisan
The Artisan Collection provides a curated selection of finishes expressing an elevated style and contemporary nature.

Laminates (Veneer Series)
An alternative HPL (Higher Pressure Laminate) laminate work surface can be specified on most of our casegood product lines. The specification pages will also list the available coordinating finishes.

Laminate Series
JSI laminate series offer a full laminated product with imprinted grain to hide finger prints and provide durability. The worksurface tops are HPL (High Pressure Laminate) or TFL (Thermal Fused Laminate). TFL is used on the product's chassis.

An overview of finishes and laminates appear on page IV, detailing which species each veneer finish is applied to.

Series Material Offering
Select finishes, species and materiality are availble on a per series offering, with JSI curating the correct palette offering for the series intent. Please refer to each series feature highlights within the product pages to identify the material, species, grain patterns and finishes availble for that specific series.

JSI Core Materials
For projects requiring similar finishes across multiple series, JSI recommends using our Core Materials program. Finishes in this group are offered throughout the vast majority* of JSI products in the three main material categories Essentials and Artisan Veneer, Laminate and Solid Maple, in a spectrum of light to dark.

*note: not applicable to all series, for example BeSpace only offers clear veneer finish.

Finish - Top Coat
To reduce hazardous formaldehyde emissions, we use our proprietary specially designed top coat, DuraTex™. It significantly reduces hazardous formaldehyde emissions and helps improve indoor air quality.

Finish - Color/Stains
A wide range of stains are available to bring out the beautiful characteristics of each wood species. We coordinate finish color between our veneer stains and solid lumber stains; however, not all may be a perfect match. The stains are continually reviewed for accuracy of color, as well as a constant monitoring of the latest color trends in the furniture market.

Finish - Matching
Due to the natural characteristics of wood, environmental effects, and material upgrades, JSI cannot guarantee exact finish matches on existing furniture previously ordered.

If an exact match is required to accompany existing furniture, it must be specified at the time of order placement, so specific internal procedures can be followed to ensure a proper and acceptable finish match. We reserve the right to change our finish formula at any time to improve safety, quality, and appearance. Unless a finish match for existing furniture is requested at the time of ordering, we accept no liability for finish that may not match the existing furniture from prior orders.

Solid lumber may inherently have mineral streaks, pits, and various other natural occurrences. Care is taken in selecting the solid lumber to coordinate with the requested finish on our veneer products. This internal selection process is subject to availability of solid lumber parts.

Finish Sheen
All casegood veneer finishes are standard in 35-sheen, with the exception of Raven, which is only offered in 15-sheen. All other finishes are available in 15-sheen, with a 5% upcharge, per model.

Custom/Special Finishes
JSI, upon request, will accommodate special finishes. A written request is required to proceed with custom finish orders. A sample reference is required for first-time matches and must be included with the written request.

There is a charge of **$400 list per order** for any non-standard wood finish.

Orders will be entered noting the special finish. A sample match will be provided to the customer. Written approval is needed before the finish process can be started. Delays in approval may have an impact on lead times.

Every effort will be made to create the requested match; however, an acceptable match may not be possible because of natural variations of wood. These natural variations can also cause minor differences in the final finish product.

Use standard pricing and option pricing for each line item with a special finish, unless additional modifications have been specified. For items available in both Essential and Artisan veneers, apply the Essentials pricing.

Samples
Samples of standard wood finishes, paints colors, metal colors, and standard laminate are available upon request. The fastest way for requests to be filled is by using our website. See below for options to request samples.

Fire Retardancy
All JSI upholstered components comply with California Bureau of Home Furnishings and Thermal Insulation-Technical Bulletin 117-2013 issued by State of California Department of Consumer Affairs. This standard requires
upholstered furniture to be safer from the hazards associated with smolder ignition in all four (4) categories of materials, as applicable.

Compliance with more stringent codes may require special manufacturing considerations and upcharges.

California Technical Bulletin 133 (CAL 133)
JSI uses a barrier material between the foam cushioning and the upholstery cover in order to comply with CAL 133. The standard upcharge on products specified to comply with CAL 133 is **$85 list per yard** of textile.

JSI has performed a series of full scale fire tests on samples-representing worst case scenarios of upholstered units- to comply with the requirements of the state of California Technical Bulletin 133 (CAL 133). Products in compliance are labeled in accordance of the standards.

Some product designs and fabric cannot be combined to comply with CAL 133. Because of this, we reserve the right to reject any request for an upholstery cover, including COM, textile may not contain olefin or product style that we feel may compromise the integrity or safety of a product specified to comply with CAL 133.

Contact Customer Service for a quote if you require laboratory certification that a specific product and upholstery combination WILL PASS CAL 133. The quotation will include testing, video, and transportation charges plus the list cost of the sample.

Our standard lead time will apply to products that do not require certification. Allow an additional six weeks over the standard lead time for products that need actual laboratory certification.

The end user, specifier and/or dealer have the responsibility to make sure all products specified will meet the flammability and safety codes of the jurisdiction where the products will be located and used.

Flame Spread
All JSI may be required to comply with the requirements of Flame Spread based on ASTM standards/NFPA Life Safety Codes and general public knowledge are as follows:

Solid Wood- Class C
Topcoats- Class A
Carded Fabric- Class A
Composite Panels- Class C
Laminate- Class B

Plastics- According to the NFPA, the lack of stability of plastics under high temperature conditions and inherit combustibility have eliminated the use of plastics for applications requiring a flame spread rating.

Also be advised that improvements may be attained in certain instances with the addition of chemicals which may add additional costs, chemical exposure and/or compromise the integrity of the product.

Care and Maintenance

Care and Maintenance

Care of Upholstery Surfaces

Cleanability will vary based on the fabric type. For best results, a professional service is recommended. Dirt and crumbs may be gently brushed or vacuumed off. Spills should be wiped up immediately with a cloth. Vinyl textiles can be cleaned with warm soapy water and then wiped down with a warm damp cloth. For more details on any JSI carded fabric and vinyl, please visit our website at jsifurniture.com or consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Maintenance of Mechanical Parts

Clean any lint or debris from the moving parts of the base mechanisms. Mechanisms have been designed and tested to not require lubrication under normal conditions; however, lubricant can be used if needed.

Care of Wood Edges and Veneer Surfaces

Clean all surfaces frequently with water dampened soft cloth, moving the cloth with the grain direction. Immediately remove any liquids that come in contact with wood surfaces with a blotting action to absorb liquid. Buff dry. Lift objects to move them, never pull them across the finished surface. For an additional safeguard, use a protective surface pad. This will ensure a lasting finish by protecting your furniture from possible damage caused by pens, cups and sharp objects. Avoid exposure of furniture to extremes of heat and cold, or to wide humidity variances. Avoid exposure of furniture to strong sunlight. Avoid exposure of furniture to harsh solvents such as nail polish remover, acetates, etc., as it will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breath.

Care of Metal Finishes

Wash you powder-coated item at least one every six months. Use soft rags only - No abrasives. For stubborn stains and grease marks, use soap and water mixture. Combine 1 gallon of water and 1 cup of the neutral detergent in the bucket. Mix it up by swirling one of the rags around in it. Wipe down the powder coat with a rag that has been dampened with the cleaning solution. Do not scrub, but use gentle, repetitive pressure to remove any built-up grime. Rinse the powder coat off with a rag dampened with clear, clean water. Do not spray it down, but rather wipe it off with the rag. You may need to do this several times to get all the soap off. Wipe the powder coat down with a clean dry rag. This will prevent streaking and spotting.

Care of Frosted Glass

Use a clean, dry lint free cloth to wipe the surface. Follow with warm water and a clean rag; no soap or chemicals. Wipe dry with a clean, dry lint free cloth. Cleaning the frosted side is not recommended, if desired to clean use the above method but do not spray the water on the frosted side, use a clean rag. Please allow 48 hours for the frosted side to dry and not to show cloudiness.

Tempered Glass Information

JSI is aware of occasional occurrences of spontaneous glass breakage in various furniture products. Tempered glass makes it stronger and if it breaks, will cause it to break into many small pieces of “cubes” rather than sharp and potentially dangerous shards.

Glass breakage in furniture may occur for a variety of reasons. Tempered glass is particularly prone to breakage from damage (scratches, nicks, etc.) that may occur during shipping, handling, installation, use or maintenance. Exposure to rapid changes in temperature or concentrated temperature zones may also cause breakage.

Tempered glass may also break due to a specific type of imperfection or “inclusion” that occurs within the glass when manufactured. When this condition exists glass breakage may occur without any obvious cause. This is often referred to as “spontaneous” breakage but is a very isolated occurrence in the glass industry.

Care of Dry Erase Boards

Erase after every use to eliminate ghosting. Clean weekly with a Dry Erase Cleaner. Avoid the use of orange and red Dry Erase Markers. Follow manufacturers cleaning instructions for the eraser. If ghosting or staining remains use a small amount of rubbing alcohol on a clean, soft towel to remove.

Care of Solid Surface

Although liquids cannot penetrate Solid Surface, it is best to wipe up spills as they occur. Generally, a damp microfiber cloth used with a standard household kitchen spray should remove most stains.

For most residues, all you need to clean your Solid Surface countertops is a warm soapy water, ammonia-based household cleaner or a dedicated countertop cleaner. Do avoid window cleaners; however, as they can leave a waxy build-up that dulls the surface. Always clean using a circular motion.

Film will build up on countertops if water is left to dry on the surface. This film will dull the countertop surface, making the finish appear blotchy and uneven. To prevent film build-up, it is very important to wipe the countertop completely dry immediately after spills and cleaning.

Some color of Solid Surface may require more frequent cleaning to maintain a uniform finish. Darker colors tend to require more attention than lighter colors. Over time, even with proper care, your countertop will acquire a sheen. Dark colors may show light scratches more readily.

Arm Caps

Available in wood, solid surface and 3D Black Laminate. 3D Black laminate is fully sealed to prevent water, bacteria and dirt from penetrating through surface.

Seating

Wood Materials

Exterior surfaces are laminated veneers either in plain sliced walnut or rift cut white oak.

Seating exterior components are made up of layers of hardwood veneer molded to shape and RF cured. Outer veneers are matched for a uniform grain pattern. Exterior plywood is ⅝ " thick.

Interior seating frame and support components are made from ¾" interior grade plywood.

Metal Materials

Exterior feet and leg frames are fabricated from 14 guage steel tubing and welded to pre-set standards.

Construction

Seating interior frames are constructed with upholstery grade plywood with precisely cut interlocking joints. All joints are glued and reinforced with staples. Critical joints are fastened with screws to reinforce the joint. Frame components are assembled using t-nuts for metal to metal connection.

Upholstery Details

Seating suspension for modular units has a 3 ½" high-resilience seat foam placed onto sheet webbing for comfort and durability. Back and arm foam is a high density foam for comfort and durability.

Freestanding upholstered units have 6" thick high-resilience seat foam for durability. The bottom of the seat plywood is ventilated to allow the seat foam to breathe. Back and arm foam is a high density foam for comfort and durability.

Single needle top stitch is used on all BeSPACE models.

Exterior Metal Components

Leg frame is welded to pre-set standards and then the outer surfaces are prepared for powder coating. Leg frame and glide will be same color.

Powder coat finishes available:

ABZ	Aged Bronze**	SBZ	Soft Bronze**
GLD	Gold**	SNK	Soft Nickel**
MBK	Matte Black	STS	Stardust Silver

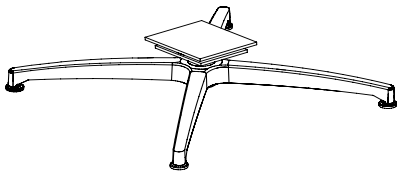
Special Features

Model BS-1 Lounge Chair with the swivel mechanism and four prong base with non-adjustable push-in glides features a 360° swivel. The standard 3.5° rearward tilt is welded in to the spindle of the mechanism plate, the spindle sits into a passive hub of the prong base. The four prong base offers the same metal finishes as the leg frames



Finish

To accentuate the beauty of the walnut or white oak veneers a clear finish coat is applied to the exposed plywood shells and platforms.

Exterior Seating Plywood Shell and Platforms are available in two finishes:

Care and Maintenance

Care of Upholstery Surfaces

Cleanability will vary based on the fabric type. For best results, a professional service is recommended. Dirt and crumbs may be gently brushed or vacuumed off. Spills should be wiped up immediately with a cloth. Vinyl textiles can be cleaned with warm soapy water and wiped down with a warm damp cloth. For more details on any JSI carded fabric and vinyl, please visit our website at www.jsifurniture.com or consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Maintenance of Mechanical Parts

Clean any lint or debris from the moving parts of the base mechanisms. Mechanisms have been designed and tested to not require lubrication under normal conditions however lubricant can be used if needed.

Metal Components

Wipe smooth powder coat finishes and textured metals with a damp cloth. For stubborn stains and grease marks, use soap and water. Lightly brush textured metals with a soft, dry brush to remove dirt.

Casegoods

Wood Materials

Exterior surfaces are laminated veneers either in plain sliced walnut or rift cut white oak.

Casegood tops are made up of layers of hardwood veneers molded to shape and RF cured. Outer veneers are matched for uniform grain patterns. All casegood tops are 3/4 " thick plywood.

Casegood chassis, doors and drawer fronts consist of veneer over composite wood core; all wood core components are 3/4 " thick.

Metal Materials

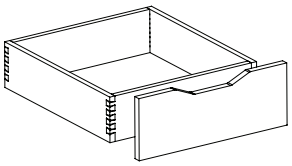
Exterior feet are fabricated using 14 guage steel tubing and 14 guage flat stock.

Construction

Casegoods are constructed with a series of glued wood dowels and metal-to -wood fastening hardware to reinforce critical joints.

Feet are field installed to prevent shipping damage, pre-bored holes make installation easy. Instructions, feet, and other hardware will be packed inside the carton.

Drawer boxes are constructed from plywood components with dovetail joinery, providing superior tensile strength to the box. Under-mount drawer suspensions are "full extension" which allows the drawers to open fully. The "soft-close" mechanism allows the drawers to close with a slight push. Drawer and door fronts feature a finger pull and are non-locking. Drawers in the BeSPACE product line are not intended for filing.



5-sided drawer box

Upholstery Recommendation

Backs are quilted on the user side and plain on the back side. High Back models include an unquilted headrest, which is not pattern matched to the quilting below.

Patterned upholsteries are not recommend for the quilted back.

When selecting upholstery, consider the material structure has on the appearance of comfort wrinkles. Highly structured, thick vinyl, backed non-stretch upholstery, faux leather and leather can increase the appearance of comfort wrinkles, where as soft pliable vinly or non-backed upholstery may limit the appearance.

Upholstery Application

Cosgrove offers the ability to be specified with multiply upholsteries to create a unique look.

Both upholstery styles are presented in the price list and eTools. Models not ending in a _M will be upholstered in the single upholstery for the complete unit.

Models ending with a_M designate multiple upholstery zones will be specified (ex: 72SMXA_M) To calculate pricing, add base price + zone 1 upcharge + zone 2 upcharge.

Zone 1 = Seat
Zone 2 = Back

When specifying multiple upholstery, make sure to identify specific yardage per zone. This can be found at the top of each product page.

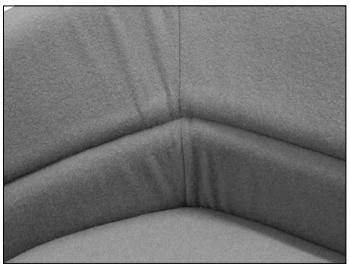
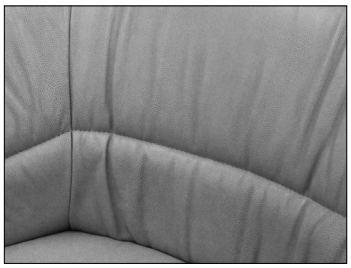
Upholstery Selection
When selecting the upholstery materials, consider the affect the upholstery structure has on the appearance of the comfort wrinkles.



High wool content upholstery, soft pliable vinyl, non-backed upholstery materials may limit the appearance of comfort wrinkles.



Highly structured, thick vinyl, backed non-stretch upholstery materials and leather can increase the appearance of comfort wrinkles.

Note: Large scale and geometric patterns applied over Indie soft contours with false welt details will impact the pattern visual.

Upholstery Detail - False Welt
False Welt - Double fold upholstery seam detail is present on Indie Lounge, Low Lounge and Pouf units.

An integral part of the upholstery application, the false welt creates a defined line while maintaining flexibility for ultimate casual comfort.

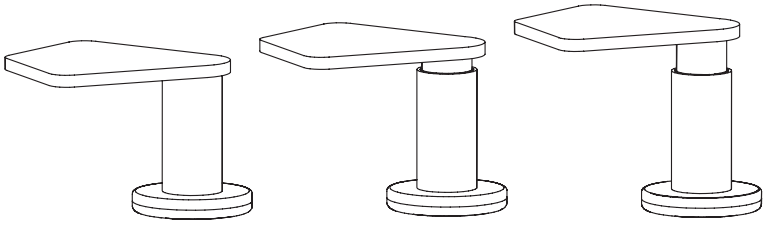
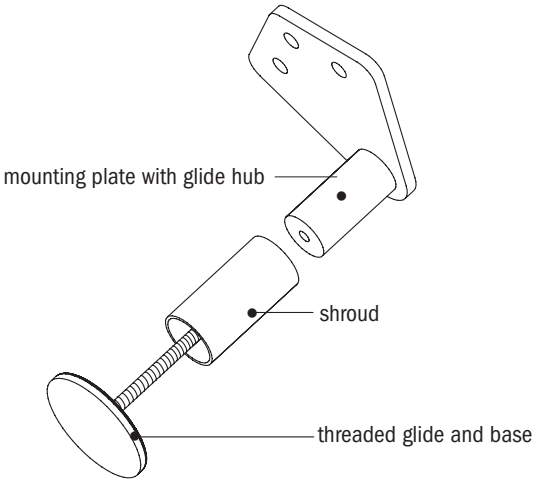
Adjustable Foot - Leveling

The standard foot has integrated leveling, which is beneficial when connecting units together in long runs on uneven floors. As the glide is turned to adjust leveling an attached shroud drops to hide the threads of the bolt.



The maximum recommended adjustment is no more than 1 ¾".



Upholstery Application
The fabric will be applied “up the roll” unless railroad is specified.

The Concave Corner unit will have a diagonal seam on all fabric applications. Shown below is an example of a directional textile on the Corner Club unit.

Additional seaming may be needed pending fabric width and fabric repeat match, contact Customer Service with questions. JSI will strive to match fabric patterns but cannot guarantee a match on repeats greater than 15” on the Moto product line.

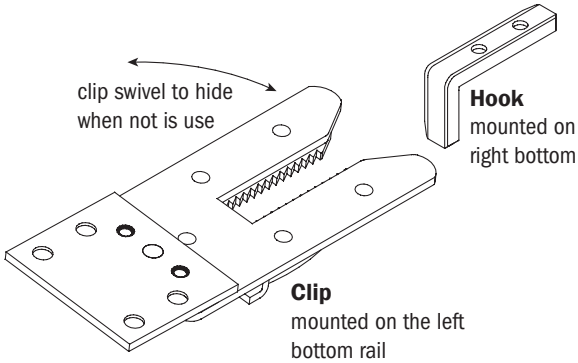
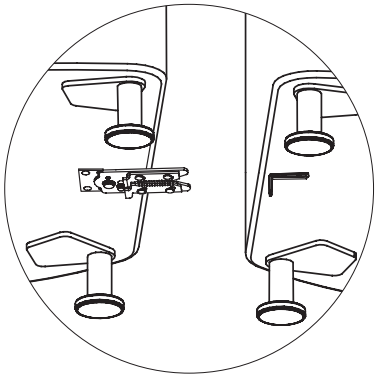
Modular Lounge and Linking Drum Tables

An Alligator Clip assembly is installed to connect lounge and linking drum tables. The clip is installed on the left bottom side rail and the hook is installed on the right bottom side rail. The bottom chair rails are bored to accept either the clip or hook for field re-configurations.





Note: Linking Table Tops are permanent bolt thru attachment and do not use the above clip.

Lounge Seating - Seam Detail

Seats have a seam detail in the center of the seat. This seam detail is standard and will help keep the tailored look of Moto. Please note that fabrics and leathers are all different (fiber content, yarn elasticity and yarn weight) which can affect the tailoring of the Moto Lounge. The aesthetic seam helps with variations in the upholstery cover. Contact Customer Service with fabric and leather information if a concern exists with a certain upholstery cover.

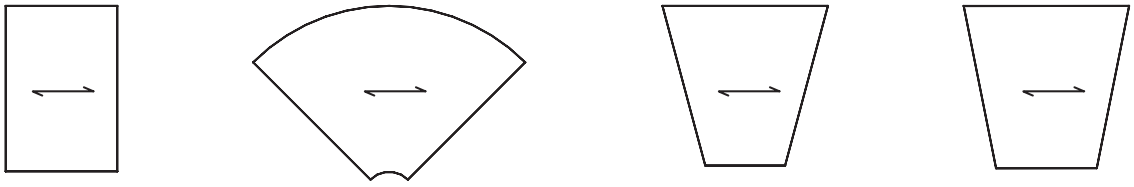
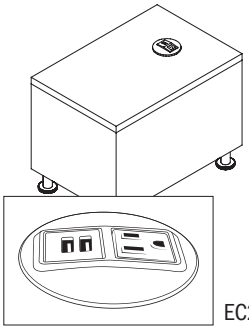
Linking Tables - Grain Direction

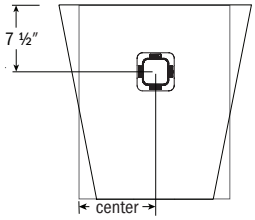


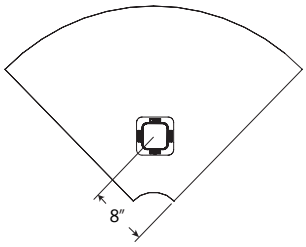
Linking Drum Tables - Power Location

The EC24 or EC23 are available on linking drum tables. Wire management moves through the bottom cavity. The location shown below is for all table shapes.



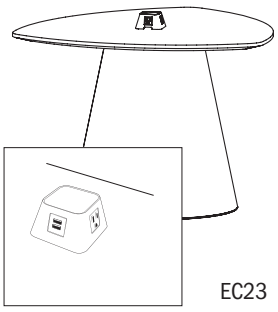
EC24



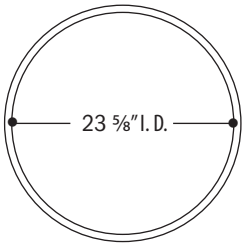


Work Tables - Power and Wire Management

The optional EC23 or EC24 is recommended for the work tables. When electrical units are used on the work tables with a conical base, the base allows wires to run through to a floor outlet. The unrestricted opening at the bottom of the base allows the base to be placed over the floor electrical monument.



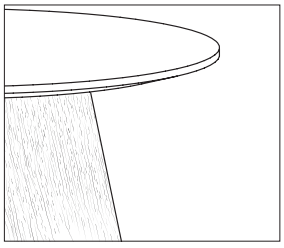
EC23



Both the EC23 and EC24 are centered on the top over the base.

Conical Table Base - Material and Grain Direction

The conical base on the pull-up and work tables is polystyrene material with a wood grain texture. This base is available in wood finishes, paint colors and laminate matching finishes. Adjustable leveling glides are included.



Media Tables and Media Credenzas - Wire Management and Power/Data

Easy access to wiring is provided in the Moto Media products. Well placed grommets, doors, and allowance inside the cabinets makes it easy to outfit these units quickly. The recommended EC25 brings power and data access to the top.

Important Upholstery Information

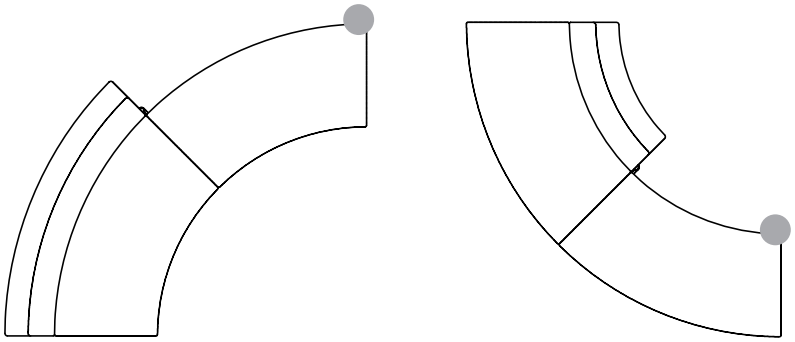
To reduce the number of seams and to achieve a clean look, **Railroaded** off the roll application is standard for Ziva. Line art and pricing for Ziva reflects railroaded fabric. **Due to the size of Ziva and minimal seams, patterned fabrics with the nap (side to side), and leather are not recommended.**

JSI strives to achieve customer satisfaction, therefore requests for patterned fabrics, with a nap application, and leather will be reviewed on a case by case basis. Fill out the sample form on the next page and contact Customer Service. Additional fabric yardage may be required and will be the customer's responsibility. The customer may also be asked to approve additional seaming. Other additional charges may apply. If a patterned fabric is specified, JSI does not guarantee matching at seams.

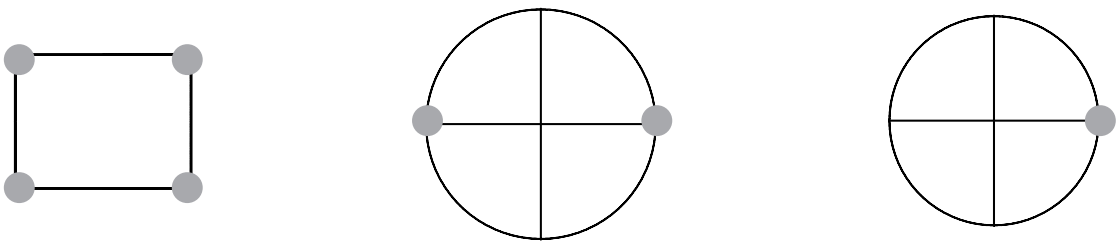
Standard Seaming

The back and seat are upholstered separately and therefore will have no joining seams, only tailoring seams as per the product design. Shown below are examples of seams required to join the fabric on the seat and surround. (marked with a ●)

The seat seam is hidden on freestanding and modular units with full backs. Partial back modular units have seaming on the bench section on the same side as the back.

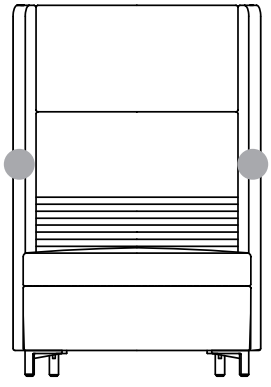


Benches (freestanding and modular) and ottomans have tailoring seams to align with the feet on the seat platform.



48″ and 42″ **36″**

Privacy Surround will have a fabric joining seam on the front band of surround.



Seating Material Options

This form must accompany order when specifying contrasting or complementary upholstery.
Call for yardage and pricing.

Area (a), (b) and (c) are upholstery and can be specified in contrasting fabric. Legs and handle are a die-cast zinc with a matte chrome finish.
