## Table Assembly

Step 1

Uncarton all product, flip table tops onto the floor back-side up. Apply biscuits and dog bones to pull top sections together. (be sure a protective padding is placed below the tops before beginning work).

Step 2

Attach Panel bases to underside of work surface with hardware provided. (be sure to utilize the correct size of screw to prevent from running through the topside of the table).

Step 3

Attach the support rails between the bases. You will also fasten the support rails to the underside of the work surface. (be sure to utilize the correct size of screw to prevent from running through the topside of the table).

Step 4

Once the leveling glides have been installed in the panel bases, carefully, with the help of as many people as possible, lift up and flip the table onto it's bases.

Step 5

Level table and make adjustments as needed. A soft rubber mallet may be used to align the table top sections by lightly tapping on the outside edges.

**Notice To Installers:** Failure to comply with installation instructions will compromise the safety, durability and performance of this product, which may risk injury to the user of this product and/or diminish the product life cycle. Jasper Group assumes no liability in these instances.
