

Hook and Clip Ganging Bracket

Install Instructions

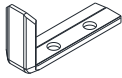

Tools Required

- #2 Phillips Head 
- Drill 

Hardware Included

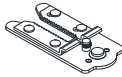

Hook Hardware

- 4 - #8 x 7/8" Flat Head Screws

Clip Hardware

- 8 - #10 x 1 1/4" Truss Head Screws

Installation

Note: Due to the product weight, it is recommended two or more people help with the installation of the chair.

Note: All screws provided must be installed for proper installation and compliance with product warranty.

1. Lay out protective floor covering (cardboard, blanket, etc.)
2. Open box and remove objects from box.
3. Turn unit so the back is on the ground and the bottom of the unit is accessible.

Hook Installation

1. Identify the 2 holes in the middle of the 6 hole pattern of pilot holes on the underside of the chair frame. (See Figure A)
2. Attach the hook using the screws provided. (Figure B, Detail A)

Clip Installation

1. Identify the 4 holes at the corners of the 6 hole pattern of pilot holes on the underside of the chair frame. (Figure A)
2. Install the 2 screws that are accessible with the clip 2 of the outside holes with the clip in the straight position.
3. Once those 2 screws are secure, rotate the clip so that another screw hole is fully visible and install another screw. (Figure C)
4. Rotate the head the opposite direction to expose the final hole and install the screw.
5. All 4 screws need to be installed in the clip.

Engagement

1. To gang the two units, simply push the hook side of a unit up to the clip side of the adjacent unit.
2. You will hear a series of 'clicks' as the hook is engaged in the clip.
3. To remove, lift the unit with the hook until it disengages from the clip.
