

V 1-COMMERCIAL AND INSTITUTIONAL BUILDINGS

WELL is an independently verified, performance-based system for measuring, certifying and monitoring features of buildings that impact human health and well-being. WELL is the first building standard to focus exclusively on human health and wellness.

WELL is broken down into 7 concepts from air to mind. Within those concepts are up to 105 features that can be applied to address issues related to human health and wellness.

JSI may contribute toward your WELL Building "WELL Score" in up to 11 of the 100 feature areas. Please check with your Architect/Designer for any Innovation features (up to 5) they may apply. Please note that additional charges may apply, materials may be subject to availability, performance standards; lead times and warranties may be affected and possible limited choice selections. The earlier we know the more we are able to help.
