Flexible. Adaptable. Fluid.

In today's world, the only constant is change. The workplace is continually evolving. Enter Flux, designed by David Allan Pessa. Flux is a fluid, forward thinking casegood series that adapts to the way you work with an extensive offering of innovative mobility, smart storage, and modern materials.

Design for the dime-size home office or the large executive suite. Convert a workspace into a meeting area with the swing of a table. Integrate height adjustability throughout the office. With Flux, work the way you want, when you want.

Cater aesthetics and functionality to your style. Elevated casegoods on metal legs create a light scale, progressive look. Or keep it simple with on-the-floor casegoods. Choose from vast work-in-process storage solutions including file and accessory shelves, side access wardrobes, and pull-out pantry drawers with concealed charging station.

Flux worksurfaces can be specified with a split top, a continuous channel for flexible wire management along the entire length of the unit. An integrated wire trough can hold power strips, laptop bricks or the Flux surface mount power unit.

Flux's material offering is as abundant as the collection, including veneer (maple, cherry, walnut or double cut) or laminate. Along with Flux, JSI is introducing two new double cut finishes and six new laminate colors. Flux is also available in neutral paints and incorporates Arctic Silver, Soft Nickel, and Pewter metal options.

Flux will be available to order by NeoCon. Come see the flexibility and vastness of Flux, this NeoCon in the JSI showroom, space #3-111.
