Authentic. Raw. Elemental.

It's human nature to want to be part of a community, a tribe. Meeting around a table is fundamental to how we relate, and ultimately, how stuff gets done. Native, a series of meeting tables and ancillary furniture, intuitively and naturally supports how meetings happen.

Whether a formal conference room with a 240" long conference table, or a casual gathering space with a 48" meeting table, Native has you covered. Outfit your corporate boardroom with lecterns and buffet credenzas. Collaborate across time zones with videoconferencing media walls. Brainstorm comfortably around occasional tables and mobile markerboards. Wherever you meet, however you meet, Native accommodates.

Angled table bases provide a foundation for work to happen and can support long surfaces with only 2 bases. Open metal frames can be clad with veneer or laminate panels to hide technology, or left open for a light-scale look. Bases can be moved up to 4" to provide flexibility upon install and removable panels give access to wiring. Adjustable height tables allow for sit-to-stand meetings in active environments.

Ancillary credenzas host a variety of configurations including surface power, AV racks, utility drawers and waste bins. Media walls, lecterns, hospitality carts and recycling cabinets enhance conference centers. Open bookshelves, mobile markerboards, upholstered benches and occasional tables provide the tools needed in any meeting space.

Raw steel bases and wood tops cater to an industrial vibe, while chrome metals and glass surfaces offer a more refined aesthetic. Specify table surfaces in a variety of materials from veneer to laminate; solid surface to glass. Install a COM top surface to a Native base for a custom look.

Designed by Qdesign, Native will be available to order in November 2018.
