Flux General Options

Laminate Products
Flux Laminate features TFL (thermally fused laminate) chassis, lockers and components. Main worksurfaces* are available in a HPL (high pressure laminate).

Eased edges of the worksurface are impact resistant (PVC) on HPL tops. The laminate is offered in wood grain patterns and solid colors. The wood grain laminate features an embossed grain to hide finger prints and light scratches. The solid laminate is smooth to the touch with a semi-matte finish. All Flux Laminate products are indoor-air certified by GreenGuard.

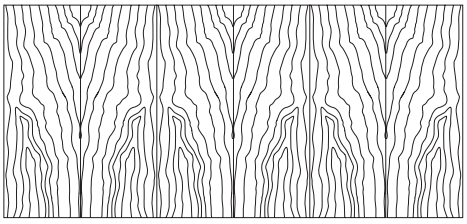

Laminate Worksurface Construction
Worksurfaces have a 3-ply balanced construction. Tops are 1 3⁄16″ thick with coordinating PVC edges. Primary worksurfaces feature 3mm PVC edges on the approach and user sides. Main worksurfaces are offered in HPL. Desk, bridge, return, and primary height credenza worksurfaces are profiled with a 3mm PVC edge on the user side only. Remaining edges are banded with 1mm PVC which creates a seamless appearance when units are mated end-to-end or back-to-back.

HPL Features on Main Worksurfaces*
- fusion of multiple layers create a higher impact resistant surface
- tops are 3-ply balanced construction
- matched to the TFL wood grain and solid patterns

Case Construction
Panels for chassis consist of a ¾″ thick substrate with TFL surfaces and PVC bands on exposed edges. Pedestal and cabinets are constructed with dowels reinforced with screw and interior plates for increased stability. Leveling glides are set into metal housing corner plate to allow for maximum leveling.

** Main Worksurfaces include tops on desks, primary height credenzas, returns, bridges and transaction tops. Refer to pricing pages to confirm availability.*

Veneer Products
Exterior wood surfaces are made from the finest selected veneers to achieve clarity and consistency in the Flux Veneer product line. To attain a pleasing, symmetrical pattern, all cherry, maple, black oak and walnut veneers in Flux Veneer are book-matched. All exterior solid lumber is matched to coordinate with the veneer.

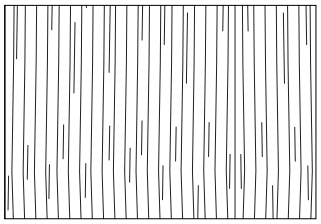

Veneer Book-Matched Example

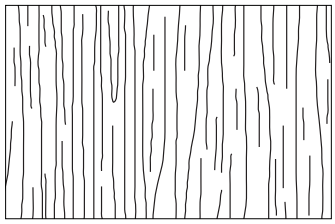

Alternating pieces of veneer are flipped over so they face each other like the pages within a book.

Flux Veneer is available in flat cut cherry, maple, black oak and walnut veneer. A wide range of wood stains have been formulated to enhance the beauty of the veneer.

Double Cut veneer is another choice on Flux Veneer product. This veneer is a processed product that has at least two cuttings to create the final veneers. These cuts of veneer strands are dyed and layered into a block to create a wide variety of patterns, from a very tight grain pattern to an exotic figure grain pattern. Linear grain patterns can be run vertical or horizontal. Please specify the grain direction.

Double Cut Veneer – Tight Grain

Double Cut Veneer – Natural Grain

Veneer Worksurface Construction
Tops are 3-ply balanced construction, 1 3⁄16″ thick with matching 1.5mm wood edges. Surfaces are available in wood veneer or high pressure laminate. No additional charge for using our coordinating high pressure laminate with a veneer grain pattern with finish wood edges.

Protective Top Coat
DuraTex™ offers exceptional hardness along with abrasion and impact resistance. It has been formulated to eliminate hazardous and harmful gases that are normally associated with wood finish.

DuraTex™ Features
- Safety - Significantly reduces hazardous formaldehyde emissions which help improve the quality of the of the indoor air we breathe.
- Quality - Developed to be tough and durable with special attention to appearance. The DuraTex™ finish preserves the natural beauty of wood.
- Durability - Designed to meet a wide range of demanding performance and environmental standards to withstand even the highest wear and tear.

Finish Sheen
All veneer finishes are standard in 35-sheen, with the exception of Raven. Raven is only offered in 15-sheen. All other finishes can have their sheen modified with a 15% upcharge added to the list price of each item.

Custom/Special Finishes
JSI, upon request, will accommodate special finishes. A written request is required to proceed with custom finish orders. A sample reference is required for first-time matches and must be included with the written request.

There is a one-time charge of **$400 list per order** for any non-standard wood finish.

Orders will be entered noting the special finish. A sample match will be provided to the customer. Written approval is needed before the finish process can be started. Delays in approval may have an impact on lead times.

Every effort will be made to create the requested match; however, an acceptable match may not be possible because of natural variations of wood. These natural variations can also cause minor differences in the final finish product.

Use standard pricing and option pricing for each line item with a special finish, unless additional modifications have been specified. For items available in both Essential and Artisan veneers, apply the Essentials pricing.

The grommet and EC26 power module locations are predetermined when selecting the peninsula mounting options; additional grommets or EC26 power modules can be specified at other locations on the secondary credenza. See page 45.

Flux Desk Details

Placement Locations
The peninsula desk may mount flush to the back panel of the credenza, or offset 5″ to allow for an overhead hutch. Placement locations can be selected during field installation.

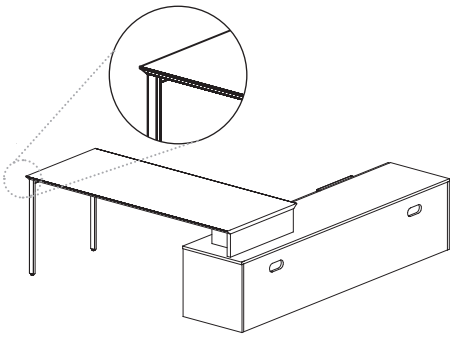

Placement 1 – Flush with Credenza Back
Can be used when no overhead storage is specified in the layout.

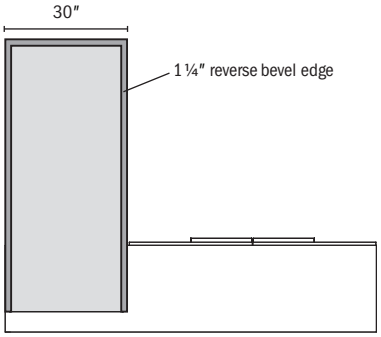

Placement 2 – Offset 5″ from Back Panel
Must be used when placing an overhead on the secondary credenza.

Note: the overall foot print grows by 5"

Reverse Bevel Edge Rules
A reverse bevel edge adds 1¼″ to the front of the desk top. Overheads that mount on the secondary credenza cannot be used with peninsula desks with reverse bevel edges. For more on edge profiles, see page 8.
