flux

flexible at every level
Flux is flexible, thoughtful office design from every angle, top-to-bottom.

JSI

flux

a new angle on teamwork
Take a different approach to collaboration with 120-degree teaming stations, or choose modernized straight benching.

JSI

flux

Tables adjust to various heights, privacy screens double as tackboards, and slat walls make a tidy place for accessories.

flux

Pantry storage towers keep belongings within arms reach, while also providing extra brainstorming space with markerboard backs.

JSI

flux

personalized yet streamlined
Credenzas and towers rest on metal legs and provide both structure and privacy. Tackboards and accessories add personalization.

JSI
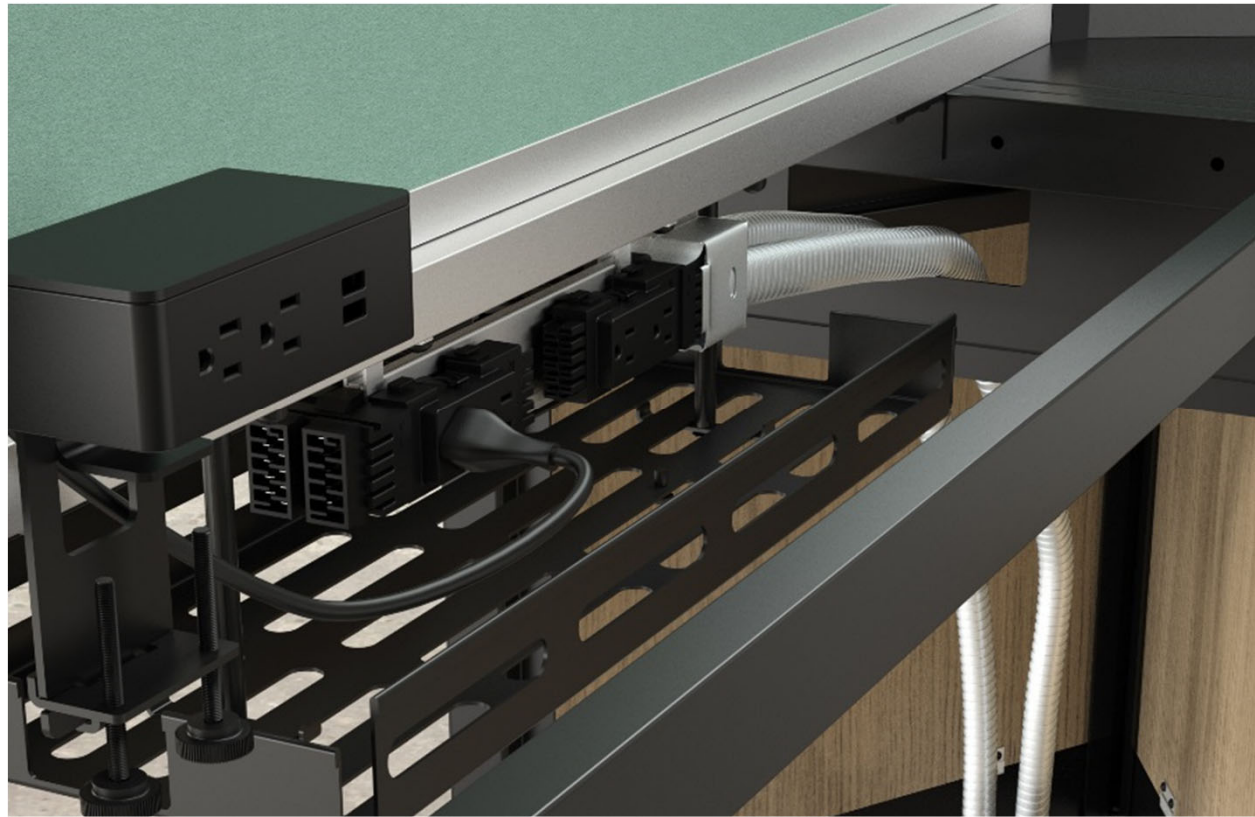

flux

Lower credenzas delineate stations, while upper storage and side screens provide further privacy, with markerboards for notes.

features

JSI

flux

minimal design, minimal distraction
End panels provide full-depth privacy on the sides, acrylic screens block distraction across the table, and movable dividers sit between stations.

flux

Runoff worksurfaces provide valuable worksurface space while movable privacy hoods encourage focused work.

features

JSI

flux

raising the open plan standards
Cases provide a sturdy base and conceal the hardware of adjustable-height benching.

flux

Light scale H-frame adjustable-height benching with integrated wire management and monitor arms to make transitions seamless.

flux

120-degree curves bring flow to a space in adjustable-height H-frame configurations, complete with privacy screens.

flux

storage finds its right place

With Flux lockers, storage is far from an afterthought. It's built right into common workspace tables, individual workstations, and standalone pieces.

flux

Secure lockers and open shelves provide clean storage and act as a room divider.

JSI

flux

Lockers and open shelves can be configured to fit any space. Common tops create common work tables.
