

a steam bent chair

STEAM BENT

AN EVOLUTION OF CRAFT.

A chair is more than just four legs and a seat. It holds a story and a history that carries its presence. Henley's story is one of inspired craft, rooted in traditions dating back to the 1920s, but also of a company steeped in its culture and passion for artistry. Utilizing the same steam bending machines from JSI's original factory to form the wood back, Henley reveals the connection between craft and culture that JSI delivers every day through its approachable, elegant, and stylish design.

meet Henley.

CURVILINEAR CONNECTIONS.

Henley curves naturally to the form of the body, offering comfort from every angle. The chair is designed as a contemporary, relaxed reflection of its counterpart, Boston, featuring the same steam bent form. Its sleek shape is seamlessly carried through to its dowel legs.

A NEW SPIN ON A CLASSIC CHAIR

The classic details shine through as updated interpretations with Henley's expressive form. Whether it's the wood seat, formed to mimic the passage of time carried out on a workbench over decades, or the clean, simple lines of the chair representing the seamless blend of tradition and innovation, Henley embodies a timeless elegance that effortlessly bridges the past and the present.
