Creating Configurations with Chairs and Tables

Knox provides multiple seating, linking brackets and connecting brackets to build an array of solutions for public seating needs, see examples on the next page and learn the building blocks below.

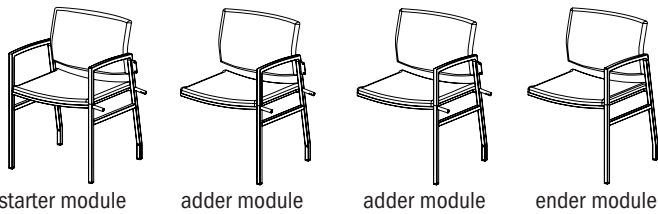

Multiple Seating

Unique model numbers have been created for two and three seat units.

Modular Multiple Seating

Multiple seating can also be ordered using modular components and assembled in the field. This allows for a row of chairs greater than three seats and only using one starter module. Adder and ender modules are shipped KD, instructions included.

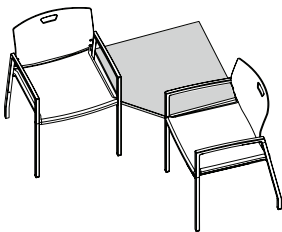

Connecting Tables

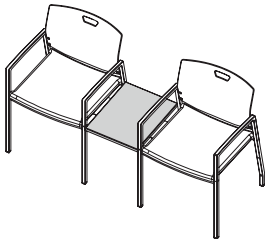

Tables can be added to any guest, bariatric or freestanding multiple seating model. Connecting brackets are installed on the underneath side of the table and require field installation.

Linked Seating

Guest, bariatric and freestanding multiple seating models can be linked together with linking brackets.

Brackets attach under seat rail and are installed in the field.
