Foot Options

Moto offers two foot styles or casters. The metal foot is standard on seating, casegoods and linking drum tables. An optional wood foot is available at an additional upcharge on lounge, linking drum tables and casegoods. Casters are available on seating with an additional upcharge. Casters are non-locking.

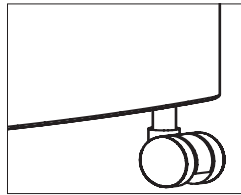

Metal Foot - Standard

Casters - Optional

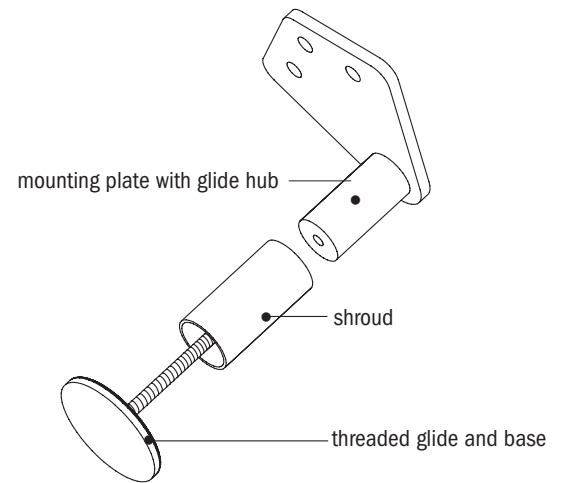

Black Dual Wheel
Four Caster Set
Non-locking

Adjustable Foot - Leveling

The standard foot has integrated leveling, which is beneficial when connecting units together in long runs on uneven floors. As the glide is turned to adjust leveling an attached shroud drops to hide the threads of the bolt.

The maximum recommended adjustment is no more than 1 3/4".

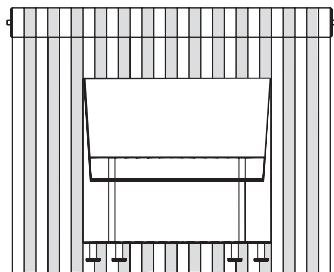

Upholstery Application

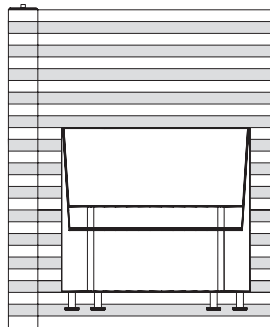

The fabric will be applied “up the roll” unless railroad is specified.

The Concave Corner unit will have a diagonal seam on all fabric applications. Shown below is an example of a directional textile on the Corner Club unit.

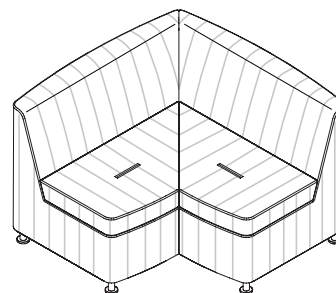

Additional seaming may be needed pending fabric width and fabric repeat match, contact Customer Service with questions. JSI will strive to match fabric patterns but cannot guarantee a match on repeats greater than 15” on the Moto product line.

Additional Product Information

Half Round Dimensions

Modular Lounge and Linking Drum Tables

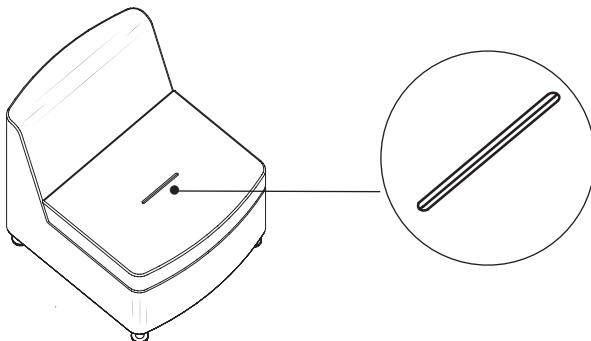

An Alligator Clip assembly is installed to connect lounge and linking drum tables. The clip is installed on the left bottom side rail and the hook is installed on the right bottom side rail. The bottom chair rails are bored to accept either the clip or hook for field re-configurations.

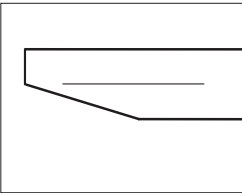

Note: Linking Table Tops are permanent bolt thru attachment and do not use the above clip.

Lounge Seating - Seam Detail

Seats have a seam detail in the center of the seat. This seam detail is standard and will help keep the tailored look of Moto. Please note that fabrics and leathers are all different (fiber content, yarn elasticity and yarn weight) which can affect the tailoring of the Moto Lounge. The aesthetic seam helps with variations in the upholstery cover. Contact Customer Service with fabric and leather information if a concern exists with a certain upholstery cover.

Linking Tables - Grain Direction

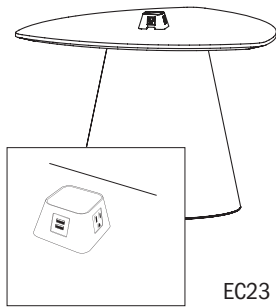

Linking Drum Tables - Power Location

The EC24 or EC23 are available on linking drum tables. Wire management moves through the bottom cavity. The location shown below is for all table shapes.

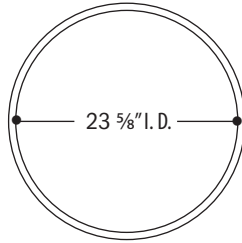

Work Tables - Power and Wire Management

The optional EC23 or EC24 is recommended for the work tables. When electrical units are used on the work tables with a conical base, the base allows wires to run through to a floor outlet. The unrestricted opening at the bottom of the base allows the base to be placed over the floor electrical monument.

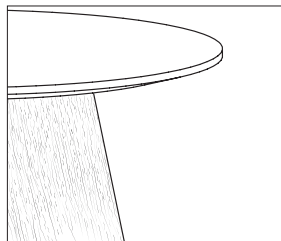

EC23

Both the EC23 and EC24 are centered on the top over the base.

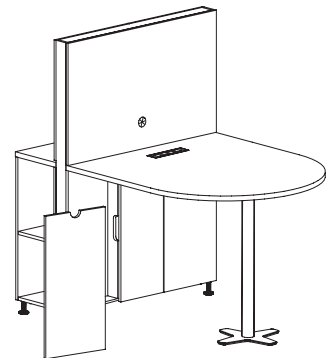

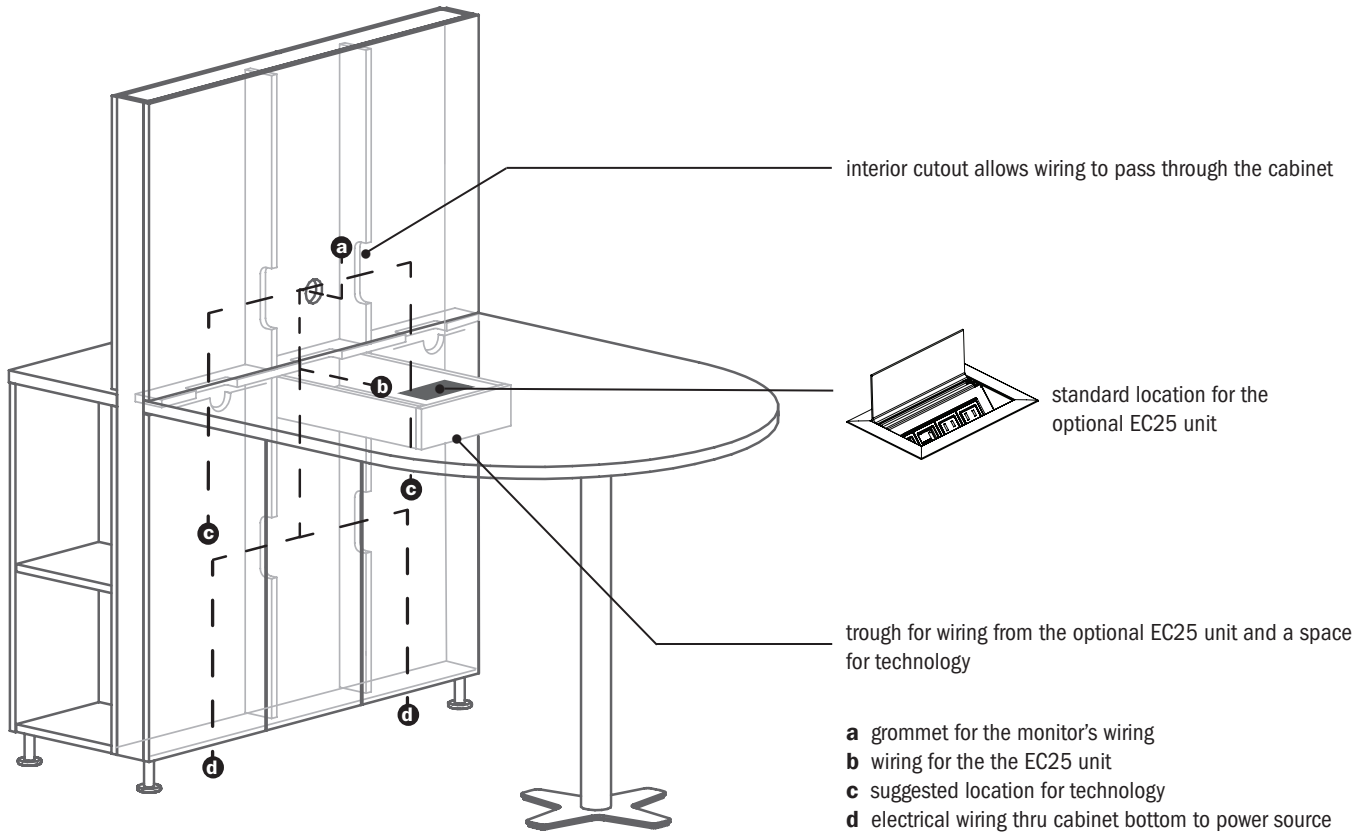

Conical Table Base - Material and Grain Direction

The conical base on the pull-up and work tables is polystyrene material with a wood grain texture. This base is available in wood finishes, paint colors and laminate matching finishes. Adjustable leveling glides are included.

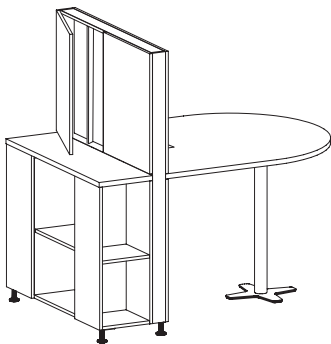

Media Tables and Media Credenzas - Wire Management and Power/Data

Easy access to wiring is provided in the Moto Media products. Well placed grommets, doors, and allowance inside the cabinets makes it easy to outfit these units quickly. The recommended EC25 brings power and data access to the top.
